

CAPABILITY STATEMENT

GFL DEFENSE

Program Management & Execution Support

GFL Defense, LLC supports defense programs through execution-focused program management and PMO augmentation, integrating directly with prime contractor and OEM program teams to align execution, documentation, and material support to operational requirements.

CORE CAPABILITIES

- Program management execution support
- PMO augmentation and coordination
- Documentation and deliverables management
- Schedule, action, and issue tracking
- Risk and dependency management
- Interface management across program stakeholders
- Sustainment and logistics program support

DIFFERENTIATORS

- Founder-led, PMP-certified program management leadership
- Execution-focused support designed to augment existing program and PMO teams
- Experience operating in coordination-intensive and documentation-heavy defense environments
- Ability to integrate directly into active programs without disruption
- Experience supporting both domestic and international program environments
- Trusted execution support with minimal oversight required

ADDITIONAL CAPABILITIES

GFL Defense supports defense program execution with sustainment-related material procurement as required. This includes sourcing sustainment items required for program execution such as batteries, antennas, power supplies, headsets, ruggedized computing systems, and related spares (e.g., Panasonic Toughbook, Bren-Tronics, Peltor/Ops-Core, Comrod/Shakespeare).
